Enhancing the quality of life for those living with dementia, their caregivers, and the community

Mindful Care provides adult day services for persons age 45 and older who are afflicted with early-onset to mid-stage Alzheimer's disease and other dementia disorders. The program, which runs five days a week, is designed to enrich the lives of those participating through loving support, care and nurturing and to help caregivers of those with dementia maintain a healthy balance in their own lives. During the day, our clients participate in music and art therapy, exercise and other activities which help stimulate their minds and provide valuable interaction and friendships with others they may not otherwise have. Mindful Care relies on grants and individual donations to help keep the program's cost low and affordable for those participating.

Mindful Care Adult Day Program Provides:

- Quality and dignified care in a safe, protective, and supportive environment
- Caring and professional staff who make service their top priority
- Carefully planned activities to stimulate the mind and promote self-worth
- Daily exercise programs to enhance physical wellness
- A chance for caregivers to rest and relax to help preserve their own wellbeing
